

2022 IMPACT REPORT

The background features a circular arrangement of five stylized human figures in various colors: purple, orange, pink, light green, and lavender. Each figure is depicted in a simple, rounded style with arms and legs extended, suggesting a group of people holding hands or standing in a circle. The figures are semi-transparent, allowing the text to be clearly visible over them.

“Circle the City
put me back together.
Without them,
I would not have made it.”

JOSE SERRANO
CIRCLE THE CITY PATIENT

FROM **KIM DESPRES,** CEO OF CIRCLE THE CITY

Dear Friends,

Reflecting on Circle the City's past year, I am grateful for our compassionate patient care and incredible staff. We are a family of multitalented and diverse individuals who go above and beyond and continue to significantly impact the men, women, and children facing homelessness in our community. As our numbers increase to over 8,000 persons served, we continue to find new and innovative ways to support our patients.

Thank you for your generosity and friendship. The love and support from our donors makes our work possible. We are changing how the community perceives homelessness and know that our work profoundly affects so many lives.

Our focus is on providing healthcare services to persons facing homelessness. We do this through five lines of service:

- **Two fixed-site family health centers**
Our Parsons Family Health Center is located in central Phoenix. Our downtown Family Health Center is located in the Human Services Campus near downtown Phoenix. Both clinics provide primary and preventative healthcare.
- **Two medical respite care centers**
Each medical respite care center offers 50 beds for those who have been living on the streets with acute medical conditions and for people experiencing homelessness being discharged from Valley hospitals who need additional time to complete their recovery.
- **Four mobile medical clinics**
Our mobile medical teams provide primary health care services to patients across Maricopa County who cannot or will not access care at a fixed-site.
- **Street Medicine**
Our street medicine teams provide backpack medicine and mental health services to people facing homelessness in encampments throughout Maricopa County.
- **Health Navigation**
Our health navigators work together with hospital staff to help connect patients facing homelessness to support services upon discharge.

I'm excited to see the many wonderful opportunities the new year holds for Circle the City. Sister Adele O'Sullivan, CSJ, MD, our founder, had a vision that has exceeded her expectations and a future that can only be measured by the impact we are making in the lives of so many individuals. As we celebrate our 10th Anniversary, we hope for and promise a better future for those in need in the years to come. This would not be possible without your continued support and belief in our mission.

Together, we are changing lives and positively impacting our community.

We appreciate you!

A handwritten signature in black ink that reads "Kim Despres".

Kim Despres, CEO

ABOUT US

Circle the City is the vision of our founder, Sister Adele O'Sullivan, CSJ, MD. After her initial career as a pharmacist, Sister Adele and her community, the Sisters of St. Joseph of Carondelet, recognized greater healthcare needs in underserved populations. Sister Adele then earned her medical degree from the University of Arizona in 1984 and returned as a doctor to care for people living on the street.

During that time, Sister Adele noticed a lack of sanitary conditions for wound care, challenges with medication management, and the lack of a place for people to rest and recover from a serious illness or injury.

That inspired Sister Adele's vision for a medical respite center for people facing homelessness. The first donations were kept in a shoebox. As donations and community support grew, Circle the City opened Arizona's first respite center for people experiencing homelessness in 2012.

We provide street medicine and behavioral health services to individuals experiencing homelessness in hard-to-reach areas. In addition, we provide health navigation services to support patients in their self-management to achieve medical and social stability.

OUR MISSION

To create and deliver innovative healthcare solutions that compassionately address the needs of men, women, and children facing homelessness.

We are a registered 501(c)(3) nonprofit, federally qualified healthcare organization.

FISCAL YEAR 2021/2022 GRANTS

In FY 21/22 Circle the City received 23 grants, resulting in total funding of \$8,070,533—the largest amount of grant funding received in a single year by Circle the City in its 10-year history. This successful year of grant funding validates grantor confidence in Circle the City’s ability to reliably provide integrated primary care services to people facing homelessness, and Circle the City’s ongoing expansion of services to meet the needs of those we serve.

Meet Lisa

Circle the City
Patient

Hi Friends,

My name is Lisa and I'm 64 years old. I hope you can take a minute and listen to my story.

Last year I lost my home because my rent went up. I'm on Social Security and I could no longer afford to stay there. I ended up sleeping on a friend's couch, staying in motels, and sometimes when money ran out, I'd sleep on the light rail.

I have heart problems, vascular disease, arthritis and other health problems. Then I got COVID. I was so discouraged. That's when someone told me about Circle the City. I went there and they transported me to a hotel in Phoenix for people who are homeless to quarantine. They gave me a room, food, and medical care. When I got out, Circle the City helped me apply for low-income housing. I just moved into my new apartment last week! I love it! Circle the City took such great care of me without any judgment. If it weren't for them, I would still be out there living on the light rail or the street.

Thank you for supporting Circle the City. They truly bless people like me.

Love,

Lisa

While experiencing homelessness, Tommie's main source of transportation was his bike. One afternoon he was hit by a hit and run driver. The accident left him with multiple injuries. Tommie was admitted to Midtown Medical Respite Center where he was able to get the treatment he needed.

Upon discharge, Circle the City connected Tommie to affordable housing. He is now healthy and celebrating three years of being in his home. No longer homeless, Tommie still chooses to ride his bike everywhere he goes to stay in shape. Tommie now advocates for the work of Circle the City.

He served as our COVID Peer Ambassador during the pandemic to encourage people experiencing homelessness to get the vaccine.

Meet Denise

Circle the City Patient

Denise is a testament to the vision of Sister Adele and the mission of Circle the City. While raising four children as a single mom and working multiple jobs, she found herself facing homelessness. While homeless, Denise was diagnosed with cancer. The hospital connected Denise to Circle the City. She was admitted to Midtown Medical Respite Center as one of our very first patients, where she was able stay while battling cancer. She won, and upon discharge, Denise was connected to stable housing.

Today Denise is cancer free, and enjoying life in her home as a grandmother, artist, volunteer, and advocate for the underserved. She regularly shares her inspiring story at speaking at events, including Circle the City's Garden Tea.

The Health Disparities Reducer Badge recognizes health centers that have achieved at least a 10 percentage point improvement in low birth weight, hypertension control, and/or uncontrolled diabetes clinical quality measures (CQMs) during consecutive reporting years for at least one racial/ethnic group, while maintaining or improving the health center's CQM performance from the previous reporting year.

The Access Enhancer Badge recognizes health centers that have increased the total number of patients and the number of patients who receive at least one comprehensive service (mental health, substance abuse, vision, dental, and/or enabling) by at least 5% during consecutive UDS (Uniform Data System) reporting periods.

10th Anniversary of Circle the City

Circle the City has become one of the most dynamic and innovative nonprofit healthcare organizations for people facing homelessness in the country.

We provide services to over 8,000 men, women and children in Maricopa County.

As we grow, we remain rooted in Sister Adele's vision of providing high quality healthcare with compassion, dignity, and respect.

Ways you can help.

Make a gift

Make a donation today and help provide lifesaving healthcare to people experiencing homelessness. No donation is too small. Your donation may qualify for a charitable tax contribution.
